

JESS NUNEZ MICROMEDIA

WEB DEVELOPER

Website programmer with fifteen years of experience in nearly all aspects of website creation, including design, development, and search engine optimization. I have strong skills with hand-coded HTML, CSS, Javascript, and PHP and the ability to work independently and creatively with clear communication between other co-collaborators. Extensive experience with Wordpress and the creation of pixel-perfect custom themes, theme options panels, custom post types, along with custom widgets and plugins. I work primarily with marketing and branding agencies as well as with individual graphic designers across the country.
